PITTSBURGH DISTRICT OFFICE
411 Seventh Avenue, Suite 1450
Pittsburgh, PA 15219

412-395-6560 • 412-395-6562 (FAX) • 412- 395-6563 (TDD)

Federal Procuring Agencies, Prime Contractors and Business Development Partners:

The Small Business Administration's HUBZone program is designed to promote job growth, capital investment, and economic development to historically underutilized business zones, referred to as HUBZones, by providing contracting assistance to small businesses located in these economically distressed communities. As a key player in the economic development arena, **YOU** are the critical link in this effort. Recognizing your importance in this process, we at the Pittsburgh District Office have created this **HUBZone Marketing Directory** specifically for your use in assisting these firms.

The Directory includes a number of helpful items:

- Profiles of each firm detailing their contracting experience, capabilities, capacity and key personnel;
- A “telephone list” of HUBZone certified firms in the Pittsburgh District’s portfolio for quick reference.

Any support which you can provide to these firms is greatly appreciated. **For those who are directly involved in contracting, please give priority consideration to these firms for upcoming contract opportunities.** Wide distribution of the Marketing Directory is also strongly encouraged. Please provide copies to any individual or organization, which might utilize the services or products of these firms.

We would like to thank you personally for your assistance in this effort and will assist you in any way possible to provide business development opportunities for these firms. Together, we can make the program work for all of us.

We would also like to give a special “thanks” to the U.S. Department of Energy/National Energy Technology Laboratory for their assistance with printing this HUBZone Marketing Directory.

Carl Knoblock
District Director

Barbara Fisher
Deputy District Director

Thomas Lord

PROFILE

Abbatron is a new company with a long-standing reputation. Abbatron acquired the assets of HH Smith. As we uphold the HHS time-tested quality product line, providing in excess of 5,000 products to companies in 42 different countries. We look forward to providing new product offerings, expanded technical support and improved service to help your business reach the highest levels of success.

The utmost goal is to deliver products of outstanding quality and dependability. At Abbatron, we believe that by being the easiest to do business with and providing the best value, we enable our customers to reach new levels of success.

CONTRACTING EXPERIENCE

Abbatron offers engineering and technical support for design of new applications, or re-design for performance or cost effectiveness. Our 40,000 square foot manufacturing facility houses a variety of capabilities that when combined with these support services, allow for standard part modifications and new product designs.

CAPABILITIES

Abbatron, LLC is completely capable in completing projects for government and industry in the following classifications.

North American Industry Classification System

334419 – Other Electronic Component Manufacturing
332721 – Precision Turned Product Manufacturing
334417 – Electronic Connector Manufacturing
335931 – Current-Carrying Wiring Device Manufacturing

CAPACITY

Abbatron's bonding capabilities and credit references are available upon request.

PROFILE

Advanced Computer & Network Corporation designs, manufactures and markets high-performance, competitively priced data storage RAID systems. With an extensive line of storage solutions for any computing platform and operating system, comprehensive free technical support, and fast on-time product deliveries, AC&NC brings freedom of choice to all clients, from workgroup to enterprise. Our RAID systems ensure rapid, round-the-clock access to all of the information our customers rely on to move forward in the 21st century.

Founded in 1993 and headquartered in Pittsburgh, Pennsylvania, AC&NC has experienced steady growth. In fact, the sales have grown over 120% for every year the company has been in business. At the same time, long term R&D expenditures grew threefold in order to facilitate product development and position the company to take advantage of storage market trends and opportunities. We employ direct sales force and reseller channels in providing data storage solutions to clients throughout the world.

Will Ickes

PROFILE

Bedford Materials Co., Inc. (BMI), is the world leader in the development of electrical insulating materials. Formed in 1995 after purchasing the flexible insulation products plant from Westinghouse Electric Corporation – the original inventor of electrical products – BMI took over the *then* world-renowned provider of electrical insulation and quickly maintained the leadership role in developing and transferring world-class, state-of-the-art manufacturing products to government and commercial industry.

BMI is recognized as a quality supplier, achieving both ISO 9002 and QS 9000 certification, in addition to receiving numerous customer quality awards.

Strengthening U.S. defense and commercial competitiveness in today's global market begins with quality, reliability, leading edge technologies and processes.

CONTRACTING EXPERIENCE

Coated papers, flexible coated fabrics, flexible composites and prepegs for diamond pattern. Products molded from our prepegs for advanced composites. Kraft paper, glass, cotton, Kevlar™ cloths, polyester film, Nomex™ paper, and nonwoven mats and felts are coated with thermosetting resins. Our advanced composites are used in place of metal in many applications, including aircraft and armor. BMI coats substrates, such as glass, Kevlar™, and Spectra™ with a variety of resins, including phenolic, epoxy, and polyester. A large percentage of new military helmets have been molded with material developed and coated by BMI.

CAPABILITIES

Bedford Materials Company Inc. is completely capable in completing projects for government and industry in the following classifications.

Larry J. Conrad

PROFILE

A global industry leader since 1918, Brookville Equipment Corporation's diversified product line includes locomotives, personnel carriers, utility vehicles, and haulage tractors. Powered by diesel, battery, or trolley, Brookville's machines are used throughout the world in underground coalmines, hard rock and precious metal mines, tunnel construction, agriculture, rail, industrial, and switching applications. In addition, the company also rebuilds and modernizes equipment to address a wide range of buyer requirements. Brookville representatives can be found within 80 countries in the world. Additionally, a strong support network of each Brookville unit plays a key role in satisfying the long-term requirements of customers.

CONTRACTING EXPERIENCE

Brookville Equipment Corporation manufactures rail-mounted and rubber-tired haulage equipment for underground coal mining, hard rock & precious metal mining, tunnel construction, industrial switching, and mass transit applications worldwide. BEC's illustrious history provides first-hand experience in developing transportation equipment that is: innovative, cost-effective, maintenance & operator-friendly, environmentally conscious, and safety-minded.

Daniel Smitchko

PROFILE

Cutting Edge Machining Solutions, Inc., located in central Pennsylvania, is a Swiss style CNC machine shop as well as the home of Cutting Edge Bullets, producer of premium CNC turned projectiles.

Founded in 2001 by CEO Daniel Smitchko, Cutting Edge Machining Solutions, Inc. offers solutions to a wide range of industries that require the machining of precision parts in mid to high volume quantities.

The recent expansion of shop floor and office space will easily accommodate additional machinery, employees, and workload. The new addition has increased the size of the manufacturing facility from 6000 square feet to over 13,000 square feet.

Cutting Edge Machining Solutions, Inc. is currently in the process of implementing ISO 9001:2008 with a projected registration date of July, 2010.

CONTRACTING EXPERIENCE

Machining and management experience will provide you with the solution you deserve for all of your small part production needs

Frank C. Dlubak

PROFILE

For the past 50 years, our innovative ideas and exceptional products have kept us at the forefront of the glass industry. You'll find our quality work at some of the most prominent projects worldwide, from the Getty Museum to the Washington National Airport, and even Disney's retail stores. Dlubak has been involved in such high-profile projects as the 1986 restoration of the Statue of Liberty, the Liberty Bell Pavilion, and the Sears Tower in Chicago, just to name a few.

The industry recognizes Dlubak's exceptional quality as well. In 1997, Dlubak received the honor of special merit in the residential category of the 1997 Dupont Benedictus Awards for innovation in architectural glass.

CONTRACTING EXPERIENCE

Dlubak provides a wide variety of products and services in the glass and extrusion bending industry and continues to lead the way in innovative technology.

Christopher R. Ryan P.E., President

PROFILE

Geo-Solutions is a specialty construction company that offers specialized solutions to difficult soil and groundwater problems. Typical projects involve leaky levees and dams, sites with contaminated groundwater and sites with soft or settling ground conditions. Principal technologies offered by Geo-Solutions are slurry walls, soil mixing jet grouting, dynamic compaction, grouting for void filling, biopolymer drains and passive reactive barriers. In addition to construction services, Geo-Solutions offers specialized consulting services in helping owners and engineers find and select appropriate remedies for sites with difficult soil or groundwater issues. Typical assignments include feasibility studies, design mix studies, budget cost studies and litigation support.

CONTRACTING EXPERIENCE

Geo-Solutions has a long experience working on sites around the US and around the world. The principals of the company have been responsible for the physical or environmental remediation of well over 1,000 sites over the last 35 years.

Dan Smith

PROFILE

International Cartridge Corporation is the first major manufacturer to dedicate its facility to lead-free frangible ammunition. At International Cartridge Corporation we believe this raises the bar for the future of lead-free frangible ammunition. Conventional ammunition has a significant hazard associated with close range fire, ricochet and over penetration. The International Cartridge Corporation's round has controlled fragmentation characteristics while maintaining lethal penetrating capabilities. This unique performance reduces hazard for the shooter without compromising firepower.

CONTRACTING EXPERIENCE

Dothan Police Department, Grand Rapid Community College, Colonial Williamsburg Foundation, Commonwealth of N. Mariana Islands, Santa Rosa Junior College LETC, City of Chandler Arizona, MD Procurement/NSA Range, SIGARMS

Jacob Weaver – President/Owner

PROFILE

The Jacob A. Weaver Company is a wooden pallet designer and manufacturer located in Northwestern Pennsylvania. Our niche is to pursue high volume pallet users and utilize our in house engineering staff to redesign existing pallet applications and provide a pallet that is equivalent in strength or stronger and of a reduced cost compared to the existing pallet. We have saved many of our current customers millions of dollars over the years by utilizing this strategy.

The Jacob A. Weaver Company is also a supplier of cut stock (dimensioned lumber) and dunnage.

CONTRACTING EXPERIENCE

The Jacob A. Weaver Company works with each of it's customers to arrange pricing, purchasing agreements, and inventory levels that are mutually beneficial.

CAPABILITIES

The Jacob A. Weaver Company is completely capable in completing projects for government and industry in the following classifications.

North American Industry Classification System

321920 – Pallets, wood or wood and metal combination, manufacturing

321912 – Hardwood dimension lumber and stock, resawing purchased lumber

321912 – Softwood dimension lumber and stock, resawing purchased lumber

David E. Herbener

PROFILE

Focusing on consistent delivery of innovative, high-quality products, KDH has become a fully-integrated contract manufacturer and a leading designer and supplier of superior quality military personal protective equipment. KDH's military product experience includes the supply of custom light assault-style and releasable body armor systems to the U.S. Navy since 2004. Additionally, KDH has become a major supplier to the DoD for Interceptor level body armor to include soft ballistic inserts for the Modular Tactical Vest (MTV), universal NAPE pads, and complete Outer Tactical and Improved Outer Tactical Vest (IOTV) systems. KDH has a variety of high performance soft ballistic packages meeting the government's rigorous requirements for use in combat enabling flexibility in solutions and best value to the military.

KDH operates two full-capability manufacturing and warehousing facilities that house the latest in soft ballistic system development equipment and technology. Our highly trained and motivated work force is dedicated to complete customer satisfaction through reliable production with consistent quality. The Johnstown facility, in addition to housing our corporate offices, consists of 35,000 square feet of armor cutting, sewing and ballistic design operations; as well as supports product development, sales and marketing.

CONTRACTING EXPERIENCE

KDH Defense Systems, Inc. received appreciation from Pennsylvania State Senator John Wozniak
KDH wins \$6 Million Nape Pad Insert Contract
KDH Wins Major U.S. Army IOTV Award
The U.S. Army has awarded KDH Defense Systems Inc. contract for 150,000 Improved Outer Tactical Vests (IOTVs)

C. Ken Tewell / President

PROFILE:

KLA Roofing and Construction is a company that provides services for, small general construction, roofing of all kinds (excluding hot roofs), asbestos abatement and historical restoration, working as a subcontractor on federal and state contracts. The company has worked on several projects in the Pennsylvania area, and plans to bid on contracts for commercial projects at all levels throughout the Pennsylvania, Maryland and West Virginia areas. The company monitors each project with care. This means always having the best and most efficient facilities, processes, and people. To achieve this, KLA Roofing and Construction will invest in ways that will pay off in competitive advantages for its customers, such as structural plan review, including pre-job conferencing upon request, equipment, and a full line of forming, reinforcing, and aftermarket products. The company has developed a client evaluation form to gather feedback from our clients. The ultimate goal is to exceed these needs and better the company. One of the biggest concerns within the roofing and construction industry is the health and safety of its employees. KLA Roofing and Construction has made safety its number one concern; our employees and our customers expect to be safe on the job. The company has recognized the need to keep taking steps to develop a comprehensive infrastructure designed to make us not just a company with a safety policy, but a "safe company." The mission of KLA Roofing & Construction is to be the logical, first choice of clients requiring roofing and construction services within the areas we serve. KLA Roofing & Construction was founded in June of 2006, and was formed out of a previous company Call Clear Ridge Construction Services, Inc. Both companies were formed by Mr. Ken Tewell. KLA Roofing & Construction is a Pennsylvania LLC with principal offices located in Everett, Pennsylvania. KLA Roofing & Construction provides a variety of construction trades such as small general construction, roofing, asbestos abatement and historical restoration. Jobs are solicited through bids from private-sector clients, along with State and Federal Government Agencies. We also get Federal job leads from Southern Alleghenies Planning and Development Agency. We are known by and get bid invitations from several 8A contractors throughout the state of PA., NJ, MD, and WVA. The company's overall strategy is based on a continuous improvement process of setting objectives, measuring results, and providing feedback to facilitate further growth and progress.

CAPABILITIES

KLA Roofing & Construction is completely capable in completing projects for government and industry in the following classifications. Carpentry including framing, trusses, finish carpentry, punch work, roofing (NO HOT), asbestos abatement

Thomas Hilburn, Owner/President

PROFILE

Laser is a company dedicated to Product Development, Prototyping and Manufacturing including Plastic Injection Molds and Plastic Components along with Assembly and Packaging with various other components to create an end product, with customer satisfaction as the driving force. Our continuous advancements in technology and utilization of the latest equipment has put us at the forefront of the injection molding industry.

CONTRACTING EXPERIENCE

Laser Tool & Plastics has been providing Product Design, Prototyping, Manufacturing Solutions and Production to our customers for 30 years. We are a Veteran Owned, Small Business in a certified HUB Zone with our J-Cert.

We have helped several companies with steel to plastics initiatives for the purpose of weight reduction and product improvement. More recent projects involve RFID Technologies and Medical Advances.

Machining of "Exotic" metals and close tolerance production parts from AL and Titanium have gone hand in hand with our capability of intricate injection mold building which in turn compliments the Injection molding facility on-site. Recently we have added Military and Aerospace Coatings to our list of capabilities.

Located in NW PA, we have a vast resource of all types of mfg from injection and vacuumed formed plastics to stamped metal and screw machined parts. Any type of mfg needed can be found and prototyped in this area.

PROFILE:

The Company was founded in 1988. Mr. M. Douglas Lingsch is the 100% stockholder of MDL Manufacturing Industries, Inc. Since hiring its first employee in 1990, the Company has confirmed all growth expectations. MDL specializes in the engineering and manufacturing of metal and non-metal hardware for a variety of defense and commercial customers. Sales orders may consist of one prototype or many thousands of parts, and the Company's customer base includes direct support to all branches of the U.S. Armed Services, a number of prominent defense contractors, and medical, engineering research, and other commercial entities. The Company performs research and development related to prototype hardware and military components, and complete testing and inspecting of products is carried out in accordance with MIL-I-45208 and ISO 9002.

CONTRACTING EXPERIENCE

MDL is an established vendor for clients including the Department of Defense, and a subcontractor for local first and second tier manufacturers such as General Dynamics, BAE, Northrop Grumman, VSE Corporation, Johns Hopkins/U.S. Senate and others due to the Company's consistent quality and quick turnaround. The Company will work with aluminum, stainless steel, titanium and alloyed steels, heat treatable steels, plastics, fiberglass and phenolic materials.

CAPABILITIES

MDL Industries' capabilities include; Laser Cutting; CNC Turning; CNC Punching; CNC Machining; CNC Wire EDM; Aluminum and Stainless Alloy Welding; Plating and CARC Painting; Precision Sheet Metal Assemblies; Electrical Chassis and Enclosures; Rolling and Metal Forming; Conventional Machining and Turning; Precision 8 Axis Forming and Bending; 5 Axis Machining; 5 Axis Laser Cutting; Grinding and Sawing; CAD Drawings; Mechanical Assembly

North American Industry Classification System
333513, 331221, 331210

CAPACITY

The Company leases a 45,000 sq. ft. modern, well-equipped facility in White Plains, Maryland that is owned by the Principal. The Company leases a 64,000 sq. ft. modern, well-equipped facility in Bedford, Pennsylvania that is owned by the Principal. MDL Manufacturing's bonding capabilities and credit references are available upon request.

FINANCIAL DATA

Total Revenue delivered for 2007 was \$6.0 million, with total sales of \$8.7 million projected for the year ending December 31, 2008. Current contracts backlog is \$1.5 million.

MDL Manufacturing's financial data is available upon request.

Robin Ernst'Phillis

PROFILE

In 1998, Robin Ernst'Phillis and Paul Phillis launched Meadville Land Service, Inc. The driving spirit of the company began long before that when Robin, working with her father Calvin, founder of Ernst Conservation Seeds, developed an appreciation for how native plant communities work together. Combined with Paul's knowledge of heavy equipment, the company bloomed into what it is today - a full service "Mobile Restoration Company" specializing in the construction, restoration, and mitigation of streams and wetlands, as well as native planting, seeding, and the installation of bioengineering material **Meadville Land Service, Inc. is considered one of the front running contractors in ecological restoration.**

CONTRACTING EXPERIENCE

Construction, restoration and mitigation of streams and wetlands, erosion control applications including bioengineering installation, reforestation through the installation of native trees and shrubs, and seeding with specialty mixes.

Brenda Arendsen, CEO/President

PROFILE

ONIX, Inc. is a consulting firm that focuses on providing energy auditing, environmental engineering, LEED building commissioning, telecommunication auditing, and reprographic/printing solutions. ONIX, Inc. is committed to technology and a high level of service performance that meets or exceeds our clients' expectations. Incorporated in January 1996, ONIX, Inc. offers turnkey services based on our customers goals. As Fortune 1000 corporations and the Federal government are reviewing the benefits that each department is adding to the overall mission, ONIX, Inc. is positioning itself to help them meet or exceed their corporate goals. ONIX, Inc. is certified by the Small Business Administration as a socially and economically disadvantaged firm under the DBE program and HUBZone. ONIX, Inc. is certified by Allegheny County as a DBE/WBE and also certified by the State of Pennsylvania as a WBE.

CONTRACTING EXPERIENCE

Engineering Services: ONIX, Inc. is on GSA's Federal Supply Schedule GS-10F-0200L for Energy Audit and Energy Management Program Support Services. ONIX, Inc. provides technical services for energy auditing that covers the entire range of activities associated with energy management and performance contracting. ONIX, Inc. performs energy/utility audits and building surveys of architectural, mechanical, and lighting systems to any degree of detail required by the project. We design solutions and will calculate their installed and projected energy savings. ONIX, Inc. will put together a complete design and construction package for turnkey delivery. We oversee commissioning and perform monitoring and verification of energy savings. Our range of technical solutions include utility auditing, lighting upgrades, energy management system design, installation, and program modifications, evaluation and replacement of motors for higher efficiency, implementation of waterside and airside economizers, use of desiccant dehumidification, heat recovery strategies, and indirect evaporative cooling. We attack the problem of reducing and verifying energy consumption by understanding and analyzing all the energy consuming systems in the building, whether mechanical, architectural, or electrical.

Telecommunication Auditing / Cost Management: ONIX, Inc.'s telecommunication auditing / cost management goal is to allow our clients to address their inefficiencies and trouble areas with their telecommunication solution. Through our expertise and knowledge of telecommunication and the ever-changing industry, we are able to reduce operating expenses resulting in direct savings that positively impact our client's bottom line.

Reprographic/Printing: ONIX, Inc. and our team provide local and on-site reprographic facilities management services for large federal prime contractors. Today, our Management Services solution provides a wide array of local and on-site facilities management services to a variety of federal government large prime contractors. The on-site services we provide include digital printing, plotting, copying, mail services, shipping & receiving, fulfillment, facsimile, document management, records, office supplies and many other staffing services related to the non-core functions that support your business.

CAPABILITIES

Engineering Services: ONIX, Inc. and our team have experience in a wide variety of settings, from industrial to university to hospital, and we have dealt with an extremely broad range of systems and solutions. Examples are the following: Department of Veterans Affairs (VA): ONIX, Inc. has worked with the VA to provide cogeneration feasibility studies at five medical centers in the state of Pennsylvania. We have also provided renewable energy feasibility studies at several VA sites. These have addressed solar, geothermal, biomass, wind and other renewables. We have also worked with several VISNs on energy audits including VA Medical Centers and cemeteries. General Services Administration (GSA): ONIX, Inc. is currently the LEED building commissioning agent and also the LEED

building oversight for several GSA projects. Our involvement in these projects starts in the pre-planning phase and continues through post construction. General Services Administration (GSA) Metzenbaum U.S. Courthouse: Energy audit; preparation of complete proposal to include carbon dioxide monitoring; high efficiency motors; energy efficient lighting; window film; CAV to VAV conversion; and enthalpy wheel. Indian Health Service (IHS): Energy audits for five facilities in California; preparation of complete proposal to include such energy conservation measures as improving HVAC zoning; refine lighting; install occupancy sensors; variable frequency drive fans; recover waste heat to preheat domestic hot water; automate HVAC controls.

Telecommunication Auditing: ONIX, Inc. and our team have the following experience: FreeMarkets, Inc.: Completed a national telecommunication audit, which resulted in client savings. U. S. Small Business Administration (SBA): conducting a telecommunication audit throughout the entire SBA network. Client savings have been identified and realized.

Reprographic/Printing: ONIX, Inc. and our team are currently supporting over 25 large federal government contractors in 30 states throughout the United States. Our reprographic solutions support these projects which range from \$12M to over \$900M.

PROFILE

Quintech Electronics and Communications Inc. was incorporated in Indiana, Pennsylvania in 1989. The business was based on a foundation of proprietary technology and over 120 years of combined technical expertise in terrestrial microwave, CATV, and satellite communications.

Quintech has been "The Source for Reliable RF (Radio Frequency) Signal Management Solutions" serving the cable, satellite and broadcast industries. Quintech products are vital and necessary for RF signal management, optimizing the automation of today's advanced telecommunication network infrastructures.

Quintech has historically emphasized the design and development of customer driven RF signal management solutions in order to facilitate the convergence of modern telephony, broadcast, satellite and cable/HFC networks. Virtually all telecommunication network operators in the United States utilize Quintech designed and manufactured signal management products. Quintech products are also used extensively by governmental and military entities worldwide for stringently specified applications.

Paul Sekula

PROFILE

Sekula Sign Corporation has evolved greatly through the years. Before heading off to serve in WWII, Stanley Sekula formed Independent Arts Service. He specialized in show cards and banners for local stores as well as truck and window lettering. After his tour of duty, Stan, along with his new wife Yolanda, saw the opportunity to diversify the business with billboards and highway advertising. To reflect the new direction the business was taking, Stan and Yolanda decided to change the name from Independent Arts Service to Sekula Sign Service. When neon splashed the scene, the Sekulas once again heard opportunity knocking. Stan encouraged his brother, Alphonse, to attend neon bending school. After graduating, Alphonse began working for his brother, putting Sekula Sign Service full force into the neon manufacturing business. The company incorporated in 1961 becoming Sekula Sign Corporation and continued to grow with each passing year. Paul Sekula, growing up in the family business, returned after serving a military tour in Vietnam. Unfortunately, in 1970, tragedy struck with the death of Stan Sekula. Not wanting Stan's legacy to end, Yolanda and Paul took over the family business and carried on. Throughout the years, Sekula Sign Corporation has expanded and grown dramatically. Always committed to staying on the cutting edge of the sign industry, Sekula Sign Corporation operates with state of the art equipment and employs only the highest level of skilled craftsmen allowing us to produce a top end product while providing superior service, just like Stan did all those years ago.

CONTRACTING EXPERIENCE

Sign design, manufacturing, installation and service.

kono@shakainc.com

www.shakainc.com

JC Kono Morosky, President

PROFILE

Shaka, Inc.'s mission is to grow by maintaining its high reputation as a reliable, well-managed, professional, safety-conscious, and cost-effective construction company.

Shaka, Inc., established in 1988 by JC Kono Morosky, is a general construction contractor providing service to both the public and private sectors. Its base of operations is in Jeannette, PA, approx. 30 miles east of Pittsburgh. Shaka, Inc. is experienced in a wide range of Commercial and Heavy Construction Disciplines, and specializes in Concrete Rehabilitation, Streambank Restoration, and Marine Construction. Shaka also offers Design/Build services.

Shaka, Inc.'s client base consists primarily of local, city, county, and federal government agencies. Our firm has been repeatedly awarded contracts by several agencies because of their satisfaction with the quality and expedience of our work, and by the professionalism we have displayed. The Shaka Team has been recognized by the U.S. Army Corps of Engineers, with awards given for successful completion of projects at the Braddock Lock and Dam, Braddock, PA.

Shaka, Inc. offers the opportunity to work with an established, reliable and safety-conscious general contractor, with the added advantage of providing a readily available source of skilled labor through the national construction trade unions with whom we are signed.

Shaka Inc. also provides the added benefit of satisfying the requirements for minority participation. We are certified as a Disadvantaged Business Enterprise (DBE) with the following agencies: the Pittsburgh Port Authority, Allegheny County, the City of Pittsburgh, the Pennsylvania Department of General Services, and the Pennsylvania Department of Transportation.

The U.S. Small Business Administration certifies Shaka, Inc. as a socially and economically disadvantaged firm under their 8a program. Shaka is also certified as a Small Disadvantaged Business (SDB) and as a HUBZone Business. In addition, Shaka is mentoring a service-disabled veteran business.

CONTRACTING EXPERIENCE

Shaka, Inc. has provided construction services to a number of clients in both the public and private sectors including, but not limited to, the following: the Pittsburgh Sports and Exhibition Authority, the Allegheny County Sanitary Authority, the Pittsburgh Parking Authority, West Virginia University, the Borough of State College, E.L. DuPont de Nemours, and the Township of West View.

Additionally Shaka, Inc. has been awarded numerous contracts (many of which were design build projects) with the following Federal agencies

U.S. Army Reserves - 99th Regional Readiness Command

U.S. Air Force Reserves - 911th Airlift Wing

U.S. Army Corps of Engineers – Pittsburgh District, Baltimore District

U.S. Veterans Administration – Pittsburgh Healthcare System and Butler Medical Center

CAPABILITIES

236220 Commercial and Institutional Building Construction
237110 Water and Sewer Line and Related Structures Construction
237310 Highway, Street, and Bridge Construction
238110 Poured Concrete Foundation and Structure Contractors
238120 Structural Steel and Precast Concrete Contractors
238910 Site Preparation Contractor
236210 Industrial Building Construction
238350 Finish Carpentry Contractors

CAPACITY

Shaka, Inc. has multiple project bonding capabilities in excess of \$3,500,000, as well as established lines of credit with several banking institutions.

FINANCIAL

Financial data available upon request.

Duns Number: 96-523-7662

KEY PERSONNEL

Mr. JC Kono Morosky is a graduate of Slippery Rock University. For more than 25 years, Mr. Morosky has been involved in construction at varying levels. Mr. Morosky established Shaka, Inc. in 1988, developing and expanding his expertise over the course of his career and Shaka's growth. From a working background, as a Teacher/Instructor of vocational trades until 1982, he set goals and attained them. He attended and graduated from the Pennsylvania State Police Academy in 1983, and retired in the fall of 2003. Since its inception, Mr. Morosky has provided leadership, direction, and oversight on all Shaka, Inc. projects.

Ms. Vicki Esswein has 13 years experience in the construction industry, both as an owner representative and as a general contractor. She graduated from the Ohio State University in 1995 with a Bachelor of Science degree in Civil Engineering. She is a licensed Professional Engineer in the State of Ohio. Ms. Esswein provides project management on all Shaka, Inc. projects and oversees all aspects of each jobs accomplishment.

Mr. Patrick Sinopoli has over 29 years experience in the construction industry, holding senior positions in estimating, project management, construction management and operations, for building, heavy & highway & industrial/specialty construction projects. Mr. Sinopoli has provided estimating & operational oversight for Shaka, Inc., since 2005. He earned a Bachelor of Science Degree in Mathematics, with a focus in Civil Engineering from Point Park College in 1978 and continues his professional affiliations today, as a member of the American Society of Civil Engineers.
